BY ONE PERSON

**AUTOMATIC BRIGHTNESS ADJUSTMENT**  
DISPLAY INTENSITY ADJUSTED  
BY PHOTSENSITIVE CELL  
BASED ON AMBIENT LIGHT

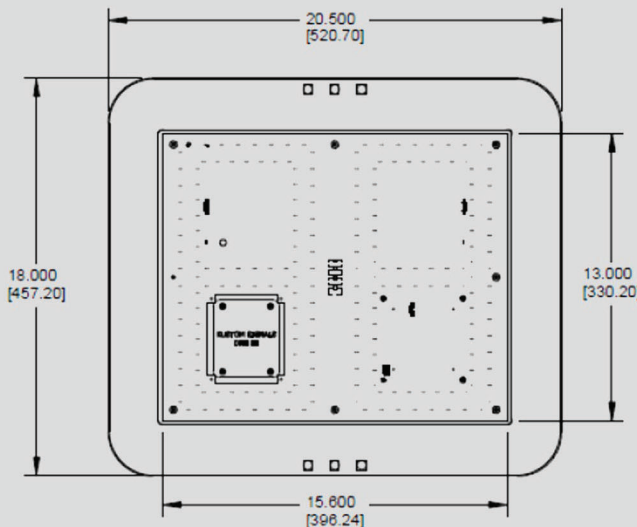

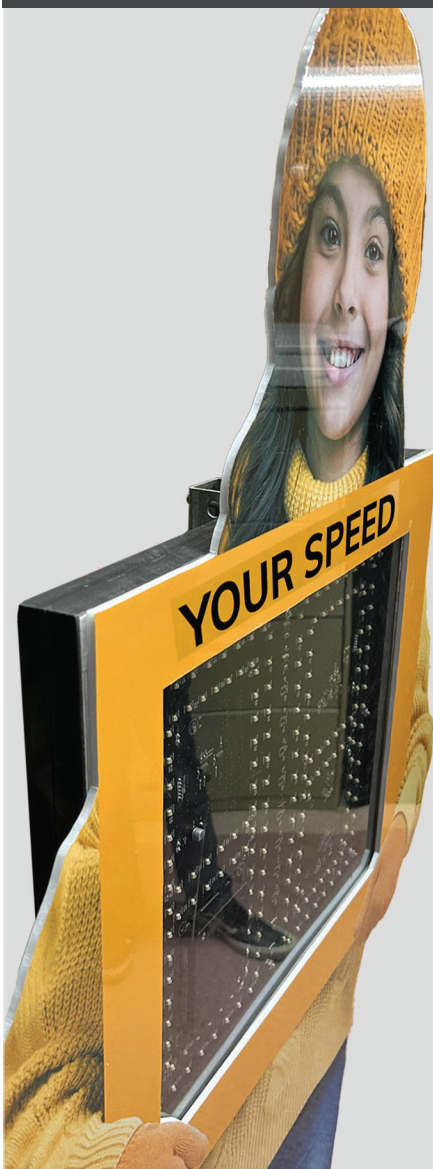

Road safety,  
I'm on board.

Our small mobile radar RAD56 is dedicated to speed reduction in high-risk areas. Installed as a preventive and temporary measure, it provides the speed of cars coming toward it. Ideal in front of schools, work sites, or any location with higher risk to pedestrians.

Movable by one person, such as a school crossing guard or traffic controller, this unit is rechargeable and easy to store.

## PORTABLE SPEED DISPLAY

- ▶ **DURABLE AND WATERPROOF PVC FOAM BODY**  
POLYCARBONATE WINDOW 1/8" (3MM)  
7 SEGMENTS, 8-8 AMBER
- ▶ **OPERATION TEMPERATURE** -40°C TO 65°C
- ▶ **RADAR RANGE** UP TO 1KM
- ▶ **MANUAL SPEED LIMIT ADJUSTEMENT ON SITE,**  
STEALTH MODE
- ▶ **OPTIMAL VIEWING ANGLE: 50°**  
FOR VISIBILITY FROM BOTH NEAR AND FAR AWAY

## Human-Faced Speed Displays on the Streets

This product, featuring a human-like facade, is designed to increase driver awareness in high-risk areas such as schools and construction zones. It is installed as a temporary, preventive measure with the goal of reducing speeds in these critical zones.

The product enhances the conventional speed display by being more accessible, easily movable by one person, and convenient to store. It is particularly suited for pilot projects and for safeguarding public workers.

## COMPATIBLE WITH EFFIA SYSTEM

RADAR ON MOBILE PEDESTAL  
MOBILE PEDESTAL - FOR BATTERIES  
(RSS44)

RADAR ON TRAILER  
EFFIA MULTI-PURPOSE TRAILER
